

Absolute
Composite Doors

WELCOME

Welcome to our exclusive range of composite doors. We supply a range of composite doors, which are all designed and manufactured on site at our premises. All of our Traditional and Contemporary door styles are bespoke and have been hand crafted to offer our customers the highest quality of composite door.

Our doors offer a wide variety of features and benefits, from our hard-wearing GRP outer skin to our unrivalled security and high thermal performance. Giving your home the warmth and security it needs. This makes our doors virtually maintenance free with no painting or ongoing upkeep required. You may occasionally however, want to wipe the door with a damp cloth to quickly clean.

Thermal Performance

Our composite doors are much more thermally efficient than traditional timber or PVC doors

A composite door offers outstanding thermal performance as it's developed using PVCu, timber, insulating foam and GRP (glass reinforced plastic). The combining of these materials makes it far more thermally efficient than your normal entrance door. Composite doors are exceptionally good at stopping cold air from the outside getting indoors and this will make you less dependent on your heating system.

The overall thermal efficiency of a composite door can be influenced by the choice of glazing for the design. Current legislation stipulates that all new doors sold and fitted in England & Wales must have a "U" value not exceeding 1.8W/m²K.

Unique Frames

Frame Colours

With Standard colours in black (beck brown), Anthracite grey, Chartwell green, Golden oak, White and Rosewood, our uPVC frames create a wonderful addition to any door style traditional or contemporary.

We also provide a full range of bespoke RAL colour options meaning you can match your frame colour to your composite door or anything you can imagine. Anything is possible!

Thresholds

CILLS AVAILABLE IN 180mm, 150mm, 95mm

Our doors are available in a number of solid colours with woodgrain finishes. New modern colour shades such as Chartwell green, duck egg blue and anthracite grey are also now readily available.

Standard Colours

Premium RAL Colours

We, at Unique, believe you should make your door as distinctive to your taste as possible, giving you the right tools to show your individuality. Here are a few of our suggestions, but your imagination is the limit with an endless array of RAL colours!

Frame Colours

Due to the limitations of the print process, colour shades may vary from those shown in this brochure. Real samples are available upon request.

Care & Maintenance

A unique composite door is the best choice for longevity and security, meaning this door could last you a lifetime. However, with that longevity and lifespan your door will be exposed to the elements and will need some light care and maintenance. We'd recommend all customers to carry out a care and maintenance routine.

- * To clean the door itself, all you need is a bucket of warm soapy water and a nice, soft cloth. (Don't use anything abrasive like a brillo pad or rough sided sponge as this may scratch your finish). The warm, soapy water is all that is required to remove any grit and grime that may have built up on your door.
- * The warm, soapy water can also be used on the frame of the door. Be sure to open the door to get all around the edges of the frames and get any of that concealed dirt that may affect the closing of your door if allowed to build up.
- * Now use a fresh, soft cloth and bucket of warm, soapy water to clean any glass in your door. Dry the glass with another soft, dry cloth and apply a household glass cleaner if you feel the glass needs something a little extra.

A black door with a white frame and a top light, set in a stone wall. The door features two vertical glass panels with a sandblasted design and a central mail slot. The top light is a rectangular panel with the word "EIGHT" in a serif font. The door is surrounded by a stone wall and a concrete walkway.

Naples

Urban Glazing
(modern aluminium glazing system)

A staple in our contemporary door collection. With its long panel style glass and its unique colour range, the Naples is a cut above some of the more simple contemporary styles especially with its aluminium glazing cassette bringing out its modern charm.

Glass used in this door style is also available in the [Caserta](#), [Lucca](#), [Bari](#) and [Monza](#) styles.

Tired of having the same style numbers as the other traditional style doors? Why not use our modern looking 7inch stainless steel wall fitted numerals.

Why not choose a modern style knocker to give you a more contemporary look (see our furniture range)

Tired of seeing letterplates on your door? Why not choose one of our stainless steel wall mounted mail boxes ?

Unique Benefits

Seen a glass design that isn't in this brochure? Just speak to your installer and leave the rest to us!

Looking for the ultimate security? Why not upgrade your lock cylinder to a market leading 3* diamond plus

Choose from an unlimited selection of RAL colours, the only limitation is your own imagination! (see page 7)
